Open Letter to Global Law Schools — Effective Immediately

To: Harvard University Law School , Stanford University Law School, Yale Law School, The London School of Economics and Political Science (LSE) (Law Department), University of Oxford Faculty of Law , Cambridge University Press & Assessment Faculty of Law, Paris-Panthéon-Assas University, National University of Singapore Faculty of Law, and leading global legal institutions.

"Requesting your coverage - ABA Journal, Law Practice Law360 The American Lawyer The National Law Journal Legal Business The National Law Review Legal Era - Legal Media Group"

Subject: Integration of AI LAW CODE™ and AI COURTS™ into Curricula — Immediate Implementation Required

Respected Deans, Faculty, and Leadership of Harvard Law School, Stanford Law School, Yale Law School, London School of Economics, Oxford, Cambridge, and the world's top legal institutions: and Leadership of the World's Top Law Schools, the legal world is at an inflection point. Artificial Intelligence is now law's enforcer. The age of advisory-only legal education is ending; the age of AI-enforced justice has begun.

I, Matt Sachdeva — Inventor, Founder & CEO of OPERIONX™, hold the intellectual property rights to AI LAW CODE™ and AI COURTS™ under USPTO jurisdiction, with WIPO filings in progress. These are not theories — they are patent-pending, enforceable systems that redefine how law will be taught, practiced, and enforced globally.

Why Law Schools Must Act Now:

AI LAW CODE™ → The world's first sovereign, machine-readable legal framework for compliance, enforcement, and adjudication.

AI COURTS™ → Judicial systems embedded in AI infrastructure, delivering real-time, auditable, sovereign rulings.

Preparing Legal Leaders → Tomorrow's judges, lawyers, and policymakers must be trained in AI-enforced frameworks — or risk being obsolete.

Mandate for Adoption:
Integrate AI LAW CODE™ and AI COURTS™ into curricula effective immediately.

Prepare your students to operate within sovereign AI-enforced legal systems that will govern commerce, politics, and justice for the next 100 years.
Engage with OPERIONX™ for licensing. As sole inventor and IP holder, I affirm that a licensing agreement is mandatory for any institution wishing to teach or deploy these systems.

The global legal order is shifting. This is no longer an academic exercise — it is a sovereign enforcement reality. Law schools that adopt AI LAW CODE™ and AI COURTS™ today will graduate leaders prepared for the future. Those who do not risk irrelevance.

I extend this as both a directive and invitation to the top law schools of the world: license, adopt, and rise to the next chapter of global jurisprudence.

Respectfully,
Matt Sachdeva

Commander Matt Sachdeva's Response:

Afzal raises the right signal — this exodus is not just about taxes, it's about trust.

Capital, like talent, migrates toward environments where systems are predictable, rules are enforceable, and governance doesn't feel ad-hoc. When wealthy families move, it's a referendum on stability, not ...more
